

## GLOBAL WARMING

As a team, we'll reduce pollution, caring is the first solution. Global warming is the team used to describe a restrained increase in the average temperature of the Earth's atmosphere, it's believed to be permanently changing the Earth's climate this is a great debate among many people and sometimes in the news, on whether global warming is real. But climate scientist looking at the data and facts agree the planet is warming. While many view the effects of global warming to be considerable and more swiftly transpire. Global has become one of the biggest complication. It is believed that the increasing levels of carbon-di-oxide gas and other greenhouse gasses on the earth. People must be aware of its meaning. Causes disagreeable effects and other things about global warming to eliminate it from the world and make the probability of life on earth perpetually as example.
